English

Forward-thinking Software Engineer with background working productively in dynamic environments.
Fluent in Website, Mobile and Desktop programming languages used to develop software within medical and embedded systems.
Proud team player focused on achieving project objectives with speed and accuracy.

Work History

10/2022 - present

Fullstack developer

Edoki Academy, Montréal

- Reviewed code, debugged problems, and corrected issues.
- Developed unit test cases for testing and automation.
- Participated in requirements gathering to solidify prerequisites and determine best technical solution to meet business needs.
- Worked with back-end developers to design APIs.
- Supervised work of programmers, designers and technicians, assigned tasks and monitored performance against targets.
- Developed next generation integration platform for internal applications.

10/2022 - present

Fullstack developer

Bayard , Paris

- Worked with back-end developers to design APIs.
- Developed functional databases, applications and servers to support websites on back-end.
- Communicated project plans, tracking details, status updates, and risk mitigation plans to cross-functional team.
- Created new and improved existing algorithms based on customer requirements or other input.
- Coordinated deployments of new software, feature updates and fixes.
- Estimated work hours and tracked progress using Scrum methodology.

06/2021 - 02/2023

CEO

Christiana, Colfontaine

- Designed, implemented and monitored web pages, plugins and functionality for continuous improvement.
- Provided front-end website development using WordPress, Hubspot and other editing software.
- Optimized company's website and main corporate blog to boost SEO traffic to sites.
- Pulled from PHP, SQL, JavaScript and other back-end library knowledge to bolster programming resources.
- Determined coding requirements for site creation, e-commerce capability, security and specialized scripts.
- Coded websites using HTML, CSS, JavaScript and jQuery languages.

09/2020 - 09/2022

Software Engineer

Comase Informatique, Charleroi

- Checked client code for bugs and weaknesses using approved

troubleshooting methods.

- Led software development initiative as subject matter expert and primary point-of-contact for project management staff.
- Authored development progress reports informing internal personnel and external stakeholders of project milestones.
- Revised, modularized and updated old code bases to modern development standards, reducing operating costs and improving functionality.
- Installed and configured software applications and tested solutions for functionality.
- Analyzed proposed technical solutions based on customer requirements, budget and product goal.
- Worked with customers for needs analysis, proposal development and vendor costs to produce competitive estimates.
- Communicated technical development stages and provided design support to businesses and other stakeholders encouraging participation for on-time execution.
- Consulted regularly with internal customers on application development project status, new project proposals and software-related technical issues.
- Collaborated with clients to define solution requirements, accounting for applicable development variables.
- Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.

Education

09/2015
- 08/2020

Computer Science And Programming, Master Degree

Haute École En Hainaut, Mons
